Artwork Specifications

Electronic Artwork:

All ads should be supplied as high resolution PDFs, **full page ads with crop marks and 5mm bleed**. Please keep all important information at least 10mm away from the edge of the artwork (excluding the 5mm bleed).

All images have to be in CMYK and in sufficient resolution for print (scanned to 300dpi at 100% of final size @150 line screen). **Make sure all text has been changed to outlines before converting the artwork to PDF. Please ensure that all spotcolours are changed to CMYK.**

Original artwork will only be accepted in Illustrator CC2018 (or lower) or InDesign CC2017 (or lower). If the artwork is set up in Photoshop, please make sure that the file is saved with 600dpi (in layers, not flattened), otherwise your text might appear blurred in print. It is not recommended to set up artwork that includes long copy in Photoshop. If you supply original artwork, please send also all fonts and images used.

If you use **rich black in backgrounds and headlines** please make sure that it is set up in C40/M0/Y0/K100. This will avoid registration problems. For body text and lines please use K100 for black only.

Single images should be sent as 300dpi and as a jpg or TIF file.

All artwork and images should be supplied on a USB stick or flash drive or send in by email.

Artwork can also be sent through wetransfer.com or hightail.com.

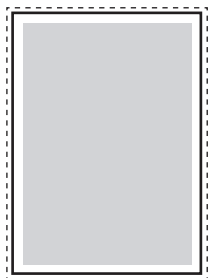

We can design your artwork:

If you want us to do your artwork, please supply text (MS Word), a rough sketch if you already have an idea of your ad and all necessary logos and images in high resolution.

Please DO NOT supply images and logos embedded in a Word file, but as separate documents.

If we have to fix artwork on your behalf, you will incur artwork costs of \$80/hour (minimum charge 1 hour).
